

DIGITAL CITIZENSHIP

WHAT IS DIGITAL CITIZENSHIP?

Digital citizenship includes three key skills: safety, literacy, and responsibility.

- Educate yourself on the safety and privacy services for your favorite website, social network, or device.
- Understand the Web tools you're using and where the information you access online comes from.
- Be responsible and practice good etiquette online: report abusive or harmful content, think before you post, and use your online power to make a positive impact.
